How to Add Printers on a Mac

1. You can set up the printer by navigating to System Preferences (In Lion, you will need to click on the IP Tab) >>> Print & Fax >>> +

2. Enter the following printer information
   a. In the Address input box, enter the Printer server IP address: 10.1.1.69
   b. In the Queue input box, enter the share name, (e.g. Wismer Copier)
   c. In the Name input box, enter the same share name as above (e.g. Wismer Copier)
   d. In the Print Using dropdown menu, select Generic PostScript Driver
   e. Click Add
