

The Accelerated 2.5 Year Hybrid Accounting Undergraduate track is a challenging and rigorous option that combines on-campus and online courses. Students should always verify with their advisor regarding class offerings, to ensure there is no overlap or conflicts depending on which semester classes are offered. The summer semesters are split into "Summer 1" and "Summer 2", meaning that students will take two or three courses in Summer 1 and two or three courses in Summer 2, and not all four or five courses at the same time. While an accounting degree in 2.5 years is difficult, we have carefully designed this curriculum so that a strong student should have no problem navigating this program successfully in this amount of time.

	Year 1	Year 2	Year 3
